About this Document

[Page]

This document describes a **draft** encoding model for Genetic Editions and Genetic Editing. The document is the product of a Workgroup on Genetic Editions (chair: Fotis Jannidis), which is part of the TEI MS SIG (chairs: Elena Pierazzo, Malte Rehbein, Amanda Galley).

The workgroup's goal was to develop an Application Profile for the encoding of genetic editions and, in general, genetic phenomena. It is expressed as a

Sequentiality in Genetic Digital Scholarly Editions

Microgenesis vs. Macrogenesis

“Microgenetic analysis, which sets up and interprets the total compositional development of a short textual fragment, stands in contrast to macrogenetic research, which looks at one or several complete collections of genetic documentation, studying large-scale phenomena.”

(de Biasi 1996, 27)

THE UNIVARIABLES

John Crow? John Crow? When know?
 Margaret, without asking, I,
 say I. What's wrong? You're in
 hysterics, I tell them that. I'm going
 going on, I tell them going, I tell them on,
 I am it or not one day, if it goes on,
 simply stayed in, in where, I can't
 of going out, is the old way, and I
 spend day and night as if I were
 away as far as it was for,
 I tell them that? I tell it to you. No
 more questions. You think you are
 simply asking, the order to all come

Step # ▲	Site	Step	Narration
1	img_17-0005	If in some cases a bit of a nautical Murat in setting forth his person ashore, the white handsome forecastle-magnate of the period in question,	Fair copying in stage Db from earlier, non-extant drafts, HM confidently inscribes text distinguishing the handsome sailor's behavior on shore as opposed to at sea. Here, the phrase "white handsome forecastle-magnate" is probably an expression used to extend the characterization of the "handsome sailor," a term already established in earlier drafts.
2	img_17-0005	... the white handsome forecastle-magnate of the period in question,	At stage Ea, while reviewing his fair copy, HM strikes through "white" in pencil. His intention might have been to retain the phrase "handsome forecastle-magnate." The removal of "white" is probably in coordination with the earlier insertion of the description of the black sailor from Liverpool on previous leaves.
3	img_17-0006	... the white handsome forecastle-magnate of the period in question,	Soon after the pencil deletion of "white," HM also deletes "forecastle-magnate" in pencil
4	img_17-0020	... the white handsome forecastle-magnate sailor of the period in question,	and inscribes the word "sailor" in pencil after "handsome," on the base line but in the right margin, to give the tentative wording "handsome sailor."
5	img_17-0005	... the . . . handsome forecastle-magnate sailor of the period in question,	Later, in the same black ink he used for fair-copying, HM retraced his pencil deletion of "white" to confirm his revision.
6	img_17-0006	... the . . . handsome . . . sailor of the period in question,	He did the same to delete "forecastle-magnate,"
7	img_17-0020	... the handsome sailor of the period in question,	and he retraced in ink the word "sailor" over the pencil inscription of that word, to give his final reading of "handsome sailor."
