Manuscript of Frankenstein: TEI Transcription

Home | Diplomatic Transcription | Reading Text | Top Layer | Mary's Text | Percy's Modifications

Description: MS. Abinger c.56

Bodleian MS. Abinger c.56 (formerly designated Dep. 477/1) consists of 62 leaves originally bound in Notebook A, one of two now disbound notebooks in which Mary W. Shelley (MWS) drafted the two-volume version of Frankenstein. The draft in c.56 runs from the beginning to the end of Volume I, concluding just as the Creature is about to begin his tale to Victor. The pages digitized in this showcase edition start at what in this draft is called 'Chapter 7th' of the Volume I draft (page 21r of the Abinger c.56 manuscript). In this chapter, Victor Frankenstein beholds his completed creature for the first time.

Author:
Mary Wollstonecraft Shelley

Modifications by:
Percy Bysshe Shelley

Transcription by:
Wout Dillen

Based on the work of:
The Shelley Godwin Archive

Holding Library:
Bodleian Libraries

Manuscript:
MS. Abinger c.56

© 2022 Wout Dillen.

About this repository

This repository contains a work in progress adaptable template repository designed to help students in the University of Borås' Digitizing Cultural Heritage Materials course to develop their own website for presenting their digitisation projects, hosted on GitHub. As such, it serves to demonstrate the potential of the [DCHM-template](#).

About this release

Apart from some minor changes and bug fixes, this new release introduces the possibility to display multiple document surfaces (with their transcriptions) in the various views.

Full Changelog: [v1.0.0...v1.1.0](#)

A Lexicon of Scholarly Editing

Dillen, Wout¹

Contributors

Researchers:

Álvarez-Carbajal, Francisco Javier¹; Barabucci, Gioele¹; Bleeker, Elli²; Crowley, Ronan³; Dahlström, Mats⁴; Franquet, Jesse⁵; Kelly, Aodhán⁶; Longo, Luciano⁷; Martínez, Merisa Ariel⁸; Neuber, Frederike⁷; Nury, Elisa⁸; Spadini, Elena⁹; Vandeyck, Caroline¹⁰; Van Hulle, Dirk¹¹; Zanardo, Monica¹²

About the Repository

The *Lexicon of Scholarly Editing* is an open academic resource for definitions of concepts that are relevant to the field of Scholarly Editing. Rather positing new definitions, however, the lexicon quotes existing definitions from textual scholars as they appear in academic articles, monographs, and the like. The Lexicon was first developed in WordPress (2012 onwards), but has been redeveloped into a Jekyll website in 2020 to make it more sustainable, more citable, to improve collaboration, crediting, and versioning options, and to allow for more automation while also publishing the definitions as a dataset. Find out more on our [About](#) page.

About this Release

When I published the v1.0.0 release, Zenodo failed to archive it. The error message indicates that the issue is due to some of the changes I made to the .zenodo.json file. Without 'related identifiers', the archiving still did not work. I am also removing languages now, to see if that combination works.

Useful Minimal Zenodo Metadata

- title
- creator
 - **name (required)**
 - orcid (optional)
 - affiliation (optional)

```
{  
  "title": "My Title",  
  "creators": [  
    {"name": "My Name",  
      "orcid": "0000-0002-7862-2403",  
      "affiliation": "My Institution"  
    }  
  ]  
}
```

NOTE!

if you use “contributors”
then “type” is required
which uses a controlled
vocabulary

More detailed information on the
JSON schema used can be found at:
[https://developers.zenodo.org/#
representation](https://developers.zenodo.org/#representation)

But: not all keys listed there are
actually acknowledged in the
import, and mistakes result in
failed deposits. So expect some trial
and error if you go freestyle.

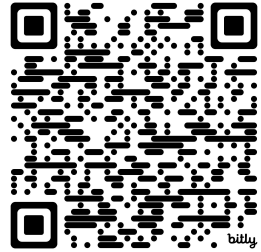

Create a .zenodo.json file %

- 1 Open your repository on GitHub
- 2 Add a new file
- 3 Name it **.zenodo.json**
- 4 Commit the file
- 5 [Archive the release](#)

Find below an example of a **.zenodo.json** file:

```
{

Why use Zenodo?

- Safe** — your research is stored safely for the future in CERN's Data Centre for as long as CERN exists.
- Trusted** — built and operated by CERN and OpenAIRE to ensure that everyone can join in Open Science.
- Citeable** — every upload is assigned a Digital Object Identifier (DOI), to make them citable and trackable.
- No waiting time** — Uploads are made available online as soon as you hit publish, and your DOI is registered within seconds.
- Open or closed** — Share e.g. an anonymized clinical trial data with only medical professionals via our restricted access mode.
- Versioning** — Easily update your dataset with our versioning feature.
- GitHub integration** — Easily preserve your GitHub repository in Zenodo.
- Usage statistics** — All uploads display standards compliant usage statistics

Get started

1 Flip the switch

Select the repository you want to preserve, and toggle the switch below to turn on automatic preservation of your software.

☒ ON (example)

2 Create a release

Go to GitHub and [create a release](#). Zenodo will automatically download a .zip-ball of each new release and register a DOI.

3 Get the badge

After your first release, a DOI badge that you can include in GitHub README will appear next to your repository below.

[DOI 10.5281/zenodo.8475](#) (example)

Attach binaries by dropping them here or selecting them.

☐ Set as a pre-release
This release will be labeled as non-production ready

☒ Set as the latest release
This release will be labeled as the latest for this repository.

Tagging suggestions

It's common practice to prefix your version names with the letter v. Some good tag names might be v1.0.0 or v2.3.4.

If the tag isn't meant for production use, add a pre-release version after the version name. Some good pre-release versions might be v0.2.0-alpha or v5.9-beta.3.

Semantic versioning

If you're new to releasing software, we highly recommend to [learn more about semantic versioning](#).

A newly published release will automatically be labeled as the latest release for this repository.

If 'Set as the latest release' is unchecked, the latest release will be determined by higher semantic version and creation date. [Learn more about release settings](#).

Generate release notes (optional)

The screenshot shows the GitHub interface for creating a new release. At the top, the repository name 'WoutDLN / lexicon-scholarly-editing' is displayed. Below the navigation bar, there are tabs for 'Releases' and 'Tags'. The 'Releases' tab is active, showing a form to create a new release. The form includes a dropdown for the version number (currently 'v1.0.10'), a dropdown for the target branch (currently 'main'), and a 'Generate release notes' button. Below these, a message states: 'Excellent! This tag will be created from the target when you publish this release.' The version number 'v1.0.10' is entered in a text field. The 'Write' tab is active, showing a text editor with the following content:

```
### About the repository
Bla-bla-bla

### About the release
Bla-bla-bla

### What's Changed
* Bump bootstrap from 4.4.1 to 4.6.2.1 by @dependabot in https://github.com/WoutDLN/lexicon-scholarly-editing/pull/74

**Full Changelog**: https://github.com/WoutDLN/lexicon-scholarly-editing/compare/v1.0.9...v1.0.10
```

Below the text editor, there are checkboxes for 'Markdown is supported' and 'Paste, drop, or click to add files'. A large dashed box with a downward arrow and the text 'Attach binaries by dropping them here or selecting them.' is present. At the bottom, there are two options for setting the release:

- ☐ **Set as a pre-release**
This release will be labeled as non-production ready
- ☒ **Set as the latest release**
This release will be labeled as the latest for this repository.

On the right side of the page, there are two sections: 'Tagging suggestions' and 'Semantic versioning'. The 'Tagging suggestions' section explains that it's common practice to prefix version names with the letter 'v' and provides examples like 'v1.0.0' or 'v2.3.4'. It also mentions that if the tag isn't meant for production use, a pre-release version can be added. The 'Semantic versioning' section explains that if 'Set as the latest release' is unchecked, the latest release will be determined by higher semantic version and creation date. It provides links to 'learn more about semantic versioning' and 'learn more about release settings'.

About the Repository

The [Lexicon of Scholarly Editing](#) is an open academic resource for definitions of concepts that are relevant to the field of Scholarly Editing. Rather positing new definitions, however, the lexicon quotes existing definitions from textual scholars as they appear in academic articles, monographs, and the like. The Lexicon was first developed in WordPress (2012 onwards), but has been redeveloped into a Jekyll website in 2020 to make it more sustainable, more citable, to improve collaboration, crediting, and versioning options, and to allow for more automation while also publishing the definitions as a dataset. Find out more on our [About](#) page.

About this Release

When I published the v1.0.0 release, Zenodo failed to archive it. The error message indicates that the issue is due to some of the changes I made to the .zenodo.json file. Without 'related identifiers', the archiving still did not work. I am also removing languages now, to see if that combination works.

This work was presented by Wout Dillen at the 2025 Huminfra Conference (HiC 2025) that took place at the University of Stockholm from 12 to 13 November 2025. It draws heavily on a workshop he conducted at the University of Antwerp Digital Humanities Summer School in July 2025. Wout currently works as a Senior Lecturer at the University of Borås, Sweden.

This work is licensed under a [Creative Commons Attribution 4.0 International Public License](https://creativecommons.org/licenses/by/4.0/). All works of other authors cited, linked, and referred to here are their intellectual property and are used for academic purposes only.

Post Credits: Adding a Badge to Your README.md

The screenshot displays the Zenodo.org interface for a specific record. The top section shows a list of files with their names and sizes. Below this, a table lists the files, including a ZIP file named 'WoutDLN/lexicon-scholarly-editing-v1.0.9.zip' which is 1.9 MB. To the right of the file list, there are buttons for 'Download all', 'Preview', and 'Download'.

The 'Additional details' section includes 'Related works' and 'Software' sections. The 'Software' section lists the repository URL as <https://github.com/WoutDLN/lexicon-scholarly-editing>.

The 'Citations' section shows a search bar and a 'Search' button. Below the search bar, it states 'No citations found'.

The 'Details' section on the right side of the interface includes a 'DOI' field with the value '10.5281/zenodo.15691819'. A green arrow points to this DOI field. Below the DOI, there is a 'Resource type' field with the value 'Software' and a 'Publisher' field with the value 'Zenodo'. There is also a 'Get the DOI badge!' link.

The 'Rights' section shows the 'License' as 'Creative Commons Attribution 4.0 International'.

The 'Citation' section shows the citation text: 'Dillen, W. (2025). A Lexicon of Scholarly Editing (v1.0.9). Zenodo. <https://doi.org/10.5281/zenodo.15691819>'. Below the citation text, there is a 'Style' dropdown menu set to 'APA' and a 'Download' button.

The 'Export' section is at the bottom right of the interface.

Scroll down and click on the DOI badge if you want to use it in your GitHub repository (to link here).

6  # A Lexicon for Scholarly Editing
7  ## About the Lexicon
8
9  The [Lexicon of Scholarly Editing](https://woutdl.github.io/lexicon-scholarly-editing/) is an open academic resource for definitions of concepts that are relevant to the field
10 of Scholarly Editing. Rather positing new definitions, however, the lexicon quotes existing definitions from textual scholars as they appear in academic articles, monographs, and
11 the like. The Lexicon was first developed in WordPress (2012 onwards), but has been redeveloped into a Jekyll website in 2020 to make it more sustainable, more citable, to
12 improve collaboration, crediting, and versioning options, and to allow for more automation while also publishing the definitions as a dataset. Find out more on our [About]
13 (https://woutdl.github.io/lexicon-scholarly-editing/about.html) page.
14
15 ## About the Developer
16
17 This repository was originally developed by [Wout Dillen](https://github.com/WoutDLN), as part of his position as a postdoctoral researcher at the [University of Antwerp]
18 (https://uantwerpen.be), while he was the university's coordinator of [CLARIAH-VL](https://clariah.vl.hypotheses.org/). Wout currently works as a Senior Lecturer in Library and
19 Information Science at the [University of Borås](https://www.hb.se/), Sweden. He is also the Secretary of the [European Society of Textual Scholarship (ESTS)]
20 (https://textualscholarship.eu/), and part of the Executive Board of the [DH Benelux community](https://dhenelux.org/). He is also the General Editor of the ESTS's journal
21 [Variants 1](https://journals.openedition.org/variants/), Deputy Editor of [Information Research](https://informationr.net), and on the editorial board of the [DH Benelux
22 Journal 1](https://journal.dhenelux.org/) - all Open Access publications.
23
24 ## About the Website
25
26 The repository's website was developed using [Jekyll](https://jekyllrb.com/), and is hosted on [GitHub Pages](https://pages.github.com/) by making use of GitHub Actions ([as
27 documented in the Jekyll documentation](https://jekyllrb.com/docs/continuous-integration/github-actions/)). It uses Jekyll plugins such as [jekyll-scholar]
```

Use **Control + Shift + m** to toggle the **tab** key moving focus. Alternatively, use **esc** then **tab** to move to the next interactive element on the page.

Attach files by dragging & dropping, selecting or pasting them.

Paste in the badge, commit your changes, and admire your work!
