edition (scholarly)

By Elisa Nury | 9 September, 2013 | Comments Off on edition (scholarly) |

“

I should like to use the name *scholarly edition* for editions which preserve or rescue a **work** of artistic, social, intellectual, or historical importance as an artifact (Shillingsburg 1986, 4).

“

Scholarly edition. An edition with **texts** established and verified according to the standards of the academic community. Such editions are also often referred to as **authoritative** (Kline 1998, 273).

collation

“

Collationner: comparer et noter les différences entre deux états génétiques ou deux **versions** imprimées d'un texte (Grésillon 1994, 242).

“

Kollation (lat. *collatio* 'Zusammentragen') Vergleich von **Texten** verschiedener **Textträger** um Übereinstimmungen und Abweichungen eines Textes zu ermitteln (Plachta 1997, 137).

“

Collation. Character-by-character comparison of two or more **texts**. Traditionally, the process by which **editors** isolate patterns of error that indicate **transcriptional** descent, to determine whether one or more texts is a copy made from an earlier and thus more reliable copy. Some twentieth-century editors have used the term to describe the process of visual comparison by which transcriptions, **galleys**, etc. are checked for error. With modern technology, the “compare” function in word-processing software performs this function by comparing the machine-readable **versions** of galleys and **page proofs** against each other (Kline 1998, 270).

conjecture

By Elisa Nury | 7 November, 2013 | [Comments Off on conjecture](#) |

“

It has often been assumed that conjecture is involved only when an editor reconstructs or creates a **reading** which is not extant in any of the **witnesses**; but the choice among extant **variants** is just as critical, and just as ultimately conjectural, as the recreation of a form which happens not to be extant in any of the witnesses (**Greetham 1994**, 352)

“

Conjectural: se dit d'une **lecture** de **manuscrit** qui reste incertaine, douteuse (**Grésillon 1994**, 242).

“

Konjektur (lat. *coniectura* 'Vermutung') Eingriff des **Editors** bei einer Textverderbnis, wenn zu vermuten ist, daß auf diese Weise der originale **Text** wiederhergestellt werden kann (**Plachta 1997**, 137).

Contribute

Without pretending to be exhaustive, this **Lexicon of Scholarly Editing** tries to be as thorough as possible by offering you the opportunity to contribute whenever you find a definition (or new entry) that may be added to the lexicon. There are basically two ways to contribute: (1) either you suggest a definition by [completing our contact form](#); or (2) by [registering](#) as a contributor and [following our guidelines](#) for entering definitions in our [WordPress CMS environment](#).

Whatever method you choose, we would like to thank you in advance for helping to expand the lexicon. We will take all definitions into consideration, and will update the lexicon as soon as possible. Afterwards, the new updates will be added to our [News Blog](#), to which you can [subscribe here](#), and we will update our [Credits Page](#) as well.
